EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Coe Miles, Attorney of Record, on November 24, 2006.

The application has been amended as follows:

In the Specification:

In paragraph [0001], line 4, "2002" has been changed to -- 2002 --.

After paragraph [0031], the following new paragraph has been inserted:

-- [0031.1] In another embodiment, the top plate comprises a surface having a substantially circular cross section. A first plurality of fixed sized openings in the top plate comprises holes having a substantially circular cross section. A second plurality of fixed sized openings is provided in a lower plate. The first and second plurality of fixed sized openings have substantially the same cross sectional shape. Gear teeth are provided on at least a portion of an outer edge of the lower plate. The side wall is coupled at an approximately ninety degree angle relative to a top surface of the top plate. The partially enclosed volume comprises a substantially

circular cross-section. The blades are adapted to sweep out substantially all of the partially enclosed volume when in a first position. The pitch adjustment mechanisms adjust the pitch between approximately plus and minus ninety degrees relative to a vertical position. At least one of the top plate and side wall comprise a metal. At least one of the top plate and side wall comprise a composite. At least one of the top plate and side wall comprise a plastic. The device may be coupled to an automobile. --

In the Claims:

Claim 22 is canceled.

In the Drawings:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In order to avoid abandonment of the application, applicant must make these agreed upon drawing changes.

In figure 8, approval is granted to delete reference numeral 125 and its lead line.

The above change to the specification at paragraph [0001] has been made to correct an informality. New paragraph [0031.1] has been inserted to provide antecedent basis in the specification for originally filed claims 2, 6, 9-13, 15, 26-28, and 30. Claim 22 has been canceled because it is inaccurate and conflicts with the limitations in claim 1, from which it

depends. The above change to figure 8 has been approved to remove reference numeral 125 and its lead line, which correspond to a different element in the other drawing figures.
